Bank on Germany

**“Euro-zone: towards more integration?”**

**Dr. Jörg Krämer, Chief Economist,  
Commerzbank AG**

The German chancellor Merkel supports the French President's initiative to deepen the currency union. What will be the impact of the German elections? Does more deepening mean that the ECB gets more room to exit its very expansionary monetary policy?

Putting Europe in a broader perspective, Dr Joerg Kraemer, also shares his perspective on the Asian economies and explains the outlook for global bond yields and currencies.

**ABOUT THE SPEAKER:**

Dr. Jörg Krämer is member of the Shadow ECB Council. Prior to joining Commerzbank he was Chief Economist of Bayerische Hypo- and Vereinsbank in Munich. He started his career at the Kiel Institute for the World Economy, where he received his PhD.
