

Intelligent Storage , Important Safety

智能仓储 安全先行

Learning Objective 学习目标

Intelligent storage system is an important part of the development of industry 4.0 to reduce occupation of place and labor, minimize loss and improve management level. Hidden risks come with the new technology and model. Collapse, collision, failure and other accidents are accompanied by the lack of technical measures. This workshop is aimed to share the experience of advanced enterprises, mature ideas and methods from the angles of safety management, safety inspection and assessment technology for the manufacturing industry.

智能仓储系统是智能制造工业 4.0 快速发展的一个重要组成部分，节约用地、替代人力、免错、防损、低储运损耗、提供管理水平。新技术和模式下的安全风险在悄然形成。由于技术措施不到位而导致的倒塌，碰撞，失效等伴随而来。本沙龙以先进企业经验分享，成熟思路和方法，从安全管理，安全技术和检验评估技术等领域为行业呈现最新资讯，采他山之石以攻玉，纳百家之长以厚己。
